Pres-On[®] Self-Adhesive Molded Bumpers Protect Equipment, Furniture & Appliances From Damage

ADDISON, IL, January 10, 2006 – Manufacturers seeking to increase customer satisfaction will appreciate Pres-On[®] Molded Bumpers designed to protect virtually any product from nicks, scratches and scuffs.

Available in square, cylindrical, hemispherical and other unique “kiss-cut” shapes, these tiny yet tough self-adhesive bumpers apply quickly to plastic, wood or metal surfaces wherever protection is needed. Applications include inside cabinet and equipment doors, lids and drawers, on the bottom of household and office appliances, or on furniture to protect floors and walls from scratches. Installation is as simple as peeling off the bumper from the multi-piece pad and sticking it on.

Non-staining and non-marring, Pres-On bumpers are made of rugged polyurethane offering superior impact resistance, plus excellent vibration and noise dampening. OEM's can choose bumpers in white, black, brown, clear or grey to match their product's color scheme, as well as select from a wide variety of widths and heights.

For pricing or free product samples, phone 800-323-7467. On the web, www.pres-on.com. E-mail: industrial@pres-on.com.
