

# Technical Data Sheet

## Adhesive and Non-Adhesive Separator Pads

- Offers protection for architectural glass, mirrors and metal
- Adhesive-backed pads available in felt, foam, cork
- Non adhesive-backed pads available in cork/foam and foam/foam
- Self-sticking but will not leave adhesive residue
- Non-marring
- Non-scratching
- Various sized die-cut pads and rolls

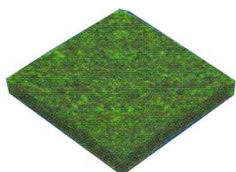

### GENERAL DESCRIPTION

When the job calls for the safe handling of fragile glass, windows, doors, and mirrors, Pres-On separator pads offer superior protection to your employees and products. Supplied in die cut sheets or on rolls, they are available in various thicknesses, materials and sizes. Non-adhesive pads are self-sticking and will not leave adhesive residue on glass or metal, while the adhesive backed pads are non-marring and are easily removed.

### APPLICATIONS

Used in the transporting, packing, storage and installation of finished and unfinished glass and easily scratched metal products. Pres-On separator pads are set between the glass pieces to absorb vibration, maintain position and prevent breakage. Also used on aluminum window frames during transport.

### PAD SIZES

#### Pres-On Felt Pads (removable PSA)

Thicknesses: 1/16 , 1/8

Square Sizes: 1/2 , 5/8 , 3/4 , 1
