## Adhering to a higher standard™

## P.O.P. Products

Pres-On is a premier source of adhesive-backed supplies for creative designers and manufacturers of P.O.P. displays, fixtures and signs. Pres-On foam tapes, dots, fasteners and hubs set the standard for excellence. Our unique "wet" coating process offers outstanding adhesive anchorage, while providing specific adhesive formulations resistant to temperature extremes, UV degradation and aging.

For more than 50 years, Pres-On has helped P.O.P. professionals reliably, quickly and cost-efficiently construct and mount displays, signs and graphics. Pres-On's extensive line of adhesive solutions come in many easy to use sizes and product constructions. Pres-On has applied bonding science to the many irregular and difficult to stick to surfaces used in the creative design of P.O.P. displays.

### Why Use Pres-On Products?

- **Complete Adhesive Anchorage:** Our wet coating process allows maximum adhesive penetration to our mounting foams and boards. In addition to assuring a permanent bond, this process provides optimal sealing protection against moisture, dust and air.
- **Research & Development:** Working together with our customers, our R&D chemists and technicians apply science to the most demanding pressure-sensitive adhesive applications assuring peak performance.
- **Custom Sizes & Configurations:** Pres-On's coating and converting facilities have the capacity to meet the most stringent specification criteria — from large diameter (up to 27"), single-wound to extreme length spool-wound. Our board sizes range from 48" x 96" to 60" x 120".

## P.O.P. PRODUCTS OFFERING

### Pres-Mount® Double-Coated Foam Tapes

Tapes are designed for use in constructing displays, mounting signs, and bonding ceiling and window mounts. On irregular surfaces, Pres-Mount's wet coating process allows full surface contact to provide extremely secure adhesion and uniform stress distribution.

- P4200: P.E. mounting foam tape in rubber PSA. 1/32" to 1/4", medium density
- P4300: P.E. mounting foam tape in acrylic PSA. 1/32" to 1/4", medium density
- P4300R1: Mounting foam tape with permanent PSA on one side, and removable PSA on the other. 1/32" to 1/8", medium density.
- P4300R2: Mounting foam tape with removable PSA on both sides. 1/32" to 1/8", medium density.
- P8200DC: Neoprene/EPDM/SBR with acrylic PSA. 1/16" to 1/2", soft density
- VF20200: Firm density vinyl foam with acrylic PSA. 1/32" to 1/4" (black, white, gray)

### High Performance Urethane Mounting Tapes

- U6200: High-density urethane foam with acrylic PSA. 1/32" or 1/8", firm density (black)
- U6400: High-performance urethane with acrylic PSA. Available in 1/32" to 1/4", medium density.

### High Bond Mounting Tapes

Water clear acrylic mounting tapes available in several thicknesses are double-coated with high performance bonding adhesives for permanent holding. Ideal for replacing screws, spot-welds or liquid adhesives in graphics and signage applications. Provides a superior bond between metal, plastic, glass and vinyl. Stock code: PHB-1010 (10 mil), PHB-1020 (20 mil), and PHB-1040 (40 mil).

### Pres-Bond® Bumpers

Polyurethane molded bumpers come in assorted sizes, shapes and colors including clear for invisibility when in use. Provides cushioning for sound dampening, excellent skid resistance and protection against scratches, nicks and skids. Release liner peels off for easy application.

### CD Hubs

Attach a CD or DVD to mailers, promo materials, cards and brochures with Pres-On CD Foam hubs. These hubs are available in soft, medium and firm densities (black or white). Diameter is 5/8" and thickness is 1/8" with custom sizes and shapes available.

### Hook and Loop Fasteners

Give your displays, banners and exhibits holding power with the flexibility to make quick changes. Pres-On hook and loop fasteners feature woven nylon design that is extremely resilient to wear. Adhesive bonds with plastics, wood, metal, glass and chipboard. Rolls are sold in various lengths, mated or unmated, in choice of rubber or acrylic based adhesive. Can be die-cut, kiss-cut or slit in rolls.

### Felt, Cork and Cork/Rubber Dots

Adhesive backed dots and custom shapes in thicknesses of 1/16" and 1/8" for anti-scratch protection. Standard felt colors are kelly green, black, brown and silver gray. Available in rolls on release liner.

### Non-Skid Foam

Crossed-link, closed cell foam coated with non-skid rubber featured a high-tack adhesive on one side for bonding to display or other POP item to keep it in place. Available in either 1/16" or 1/8" thickness.

### Display And Mounting Boards

Choose from a wide selection of boards and sizes. We offer the most options for any display manufacturer. Boards are sold plain, as well as pre-coated with our custom adhesive formulations and print receptive coatings.

Gatorfoam®
